

FOR MAXIMUM ANTI-MICROBIAL PROTECTION CHOOSE A 'HOSPITAL GRADE' SURFACE DISINFECTANT

- Surface disinfectants are classified as either 'Hospital Grade' or 'Household Grade'.
- To be classified as Hospital Grade, surface disinfectants must meet a more rigorous standard testing.
- Hospital Grade surface disinfectants are proven to kill more germs and bacteria than Household Grade products.
- Hospital Grade surface disinfectants can be tested on clean or dirty surfaces.

Proven to meet International Standard ASTM 1053 Carrier Method Test

ARTG LISTED
Kills COVID-19 within 90 seconds of surface contact
Kills 99.99% of germs and bacteria

VIRO CLEAR

For optimal protection ensure your surface disinfectant is classified as Hospital Grade

	HOSPITAL GRADE	HOUSEHOLD GRADE
Pseudomonas aeruginosa	✓	X
Proteus vulgaris	✓	X
Escherichia coli	✓	✓
Staphylococcus aureus	✓	✓
Tested on clean or dirty surfaces	✓	✓

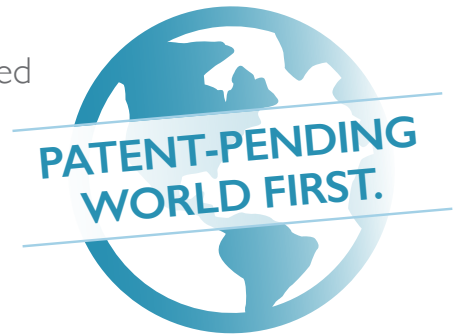

ViroCLEAR hospital grade surface disinfectant (AUST L 354369) is included in the Australian Register of Therapeutic Goods (ARTG)

VIROCLEAR USES UNIQUE BIOINNOVATE TECHNOLOGY TO CREATE A NON-ALCOHOL FORMULATION CONTAINING LOWER LEVELS OF ACTIVE INGREDIENT REQUIRED TO PASS THE TESTS USED TO PERMIT A 'KILLS COVID-19 CLAIM'.

- Some surface spray disinfectants contain levels of benzalkonium chloride between 1.0 and 5.0% considered in the irritant/toxic range by the EU and FDA.
- ViroCLEAR contains 0.12% benzalkonium chloride.
- It is also alcohol and ethanol free.

Comparative efficacy based on internationally recognised standard EN1276*

	ViroCLEAR Within 30 secs‡	80% ethanol products After 2 minutes‡
Staphylococcus aureus	COMPLETE KILL	SLIGHT REDUCTION
Escherichia coli	COMPLETE KILL	SLIGHT REDUCTION

*Testing done on clean surface. ‡Data on file.

ViroCLEAR kills 99.99% of germs and bacteria, and kills COVID-19 with 90 seconds of surface contact

Use ViroCLEAR in any situation from hospitals, schools, transportation, both in home or office.

ViroCLEAR uses unique BioInnovate technology developed right here in Australia.
